

PURE PLEASURE

FOR MULTIPLE SHIFT OPERATION

PU CONVEYOR BELTS –
UNRIVALLED FLEXIBILITY

Great strength: In cooling tunnels, as transfer belts or rotary conveyors – our PU conveyor belts are real multi-talents. Thanks to their thermoplastic polyurethane coating on the belt fabric, they are also extremely resistant and durable.

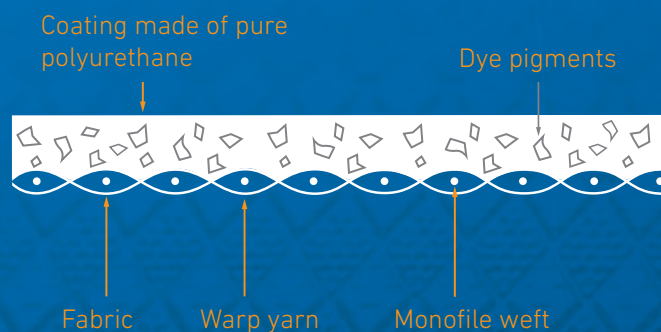

- Long service life
- Great flexibility
- Resistant to oil and fat
- Resistant to many other chemicals
- Available with customised embossing

CLEAR AS CRYSTAL: OPT FOR TRANSPARENCY!

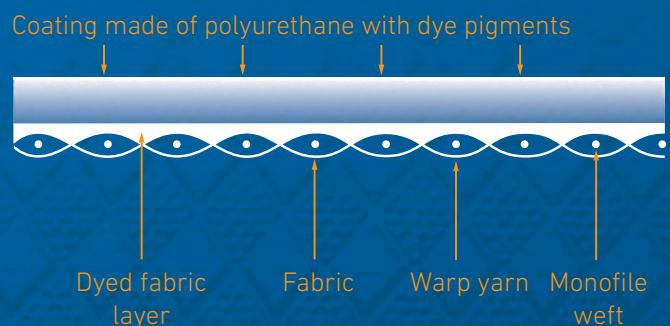

Our PU belts are available in a range of standard colours. We now also offer a transparent version, as it has been shown that bending and load stress on dyed belts can result in pigments being brought to surface, which is not desirable. Under adverse conditions, this might over time result in minute cracks that impair the resistance and strength of the material. Transparent belts are not affected by these problems, which makes them even more reliable and durable.

CROSS-SECTIONS:

1. Cross-section of PU conveyor belt with pigments in the colour layer

2. Cross-section of PU conveyor belt made of pure PU without pigments

SEVEN AT ONE STROKE
